

## ALIEN PARK DUNES

### One Sheet - June 1, 2019

**Feature Book/Film:** Novel (published Nov 15, 2018) created, written, and developed by Andrew and Julie Oien and illustrated by Lauren Oien. Book-to-film adaptation screenplay written (work in progress) by Charles C. Brooks, Prime Film Ventures, Inc.

Alien Park Dunes is the first of four planned books and parallel feature films in the Alien Park Series.

**Genre:** SciFi – Alien Conspiracy

**Logline:** When Ranger John Sloan gets transferred to the Sand Dunes Park in Colorado unexpectedly, John and his new friend park nurse Mindy Johnson, go against major forces to expose a sinister 1930's pact between the Government and 3 Alien races allowing the taking of humans from three National Parks.

**Synopsis:** National Park Ranger John Sloan, close to retirement after nineteen years, receives an unexpected transfer to the Sand Dunes Park in the San Luis Valley Colorado with reason and originator unknown by him, by John's current superiors, and by the Dunes Park management. He notices that Top Secret Security is in place at the new park, which is totally non-existent in any other National Park that he knows of. It appears that he was hand-picked by someone perhaps because of his experience gained as a guide in the seven miles of caves at his previous position at Russell Cave Monument Park.

In his first week at the new park, a child goes missing and a search is on, but not really because the park personnel know her whereabouts. Even though told to stand down, John enters a cave, finds and saves the child from Aliens, who were holding her. The child is returned to her parents by park personnel while John is taken into custody, has his memory erased, and fired from his job with full retirement pay. John subconsciously believes something happened that he can't remember, so he remains in the area, living in a motel in the nearby town of Alamosa, Colorado, to try to get his thoughts together. John and Park Nurse Mindy Johnson, who he met and became close to at the park, begin to uncover a massive conspiracy, cover-up, and crime against humanity and all people on earth.

The Alien Park series of four books and their follow-up feature film series will tell a suspense-filled, edge-of-your-seat Sci Fi thriller that's guaranteed to capture the minds and imaginations of Sci Fi fans and have them hungering for the release or premiere of the next book or film to see the continuing saga that will linger in their minds for decades to follow.

Sci Fi fans will be treated to a story of a mysterious black spacecraft orbiting earth from deep space carrying a ruthless, indestructible half-Alien/half-robot villain named Arbitrax, reminiscent of Terminator or Darth Vader with only the worst and deadliest intentions toward all life (both human and Alien) on the planet earth. Stored away on-board the spacecraft, are many Arbitrax duplicates awaiting activation should any harm come to the original. The mysterious source of Arbitrax's existence and purpose will eventually be revealed to readers and audiences eagerly awaiting the news. Technology available on-board is light years ahead of even the most advanced Alien races, allowing Arbitrax to travel at hyper-warp speed from deep space and allowing transportation to any location on earth instantly. Alien Park fans will be treated to a massive cover-up and U.S. Government sponsored and assisted Alien habitation, abductions, and experimentation with three different Alien races living underground under three National Parks where they are allowed to participate in and assisted in the abduction of park guests, most returned with their memories erased and a few never

Another mysterious Alien named Scar, because of an ugly scar left on his face by a viscous swipe from the claw of Arbitraxe, seeks revenge and may have ulterior motives and pulled strings to get Park Ranger John Sloan mysteriously transferred to the Dunes State Park instead of his planned transfer.

Alien types that fans will enjoy seeing and reading about include Tall Grays, Small Grays, Lizard-Like Alien Scouts, and Super-Human Agents in Black Suits who are part of U.S. Government underground commands in Washington, D.C. and in three National Parks, where close monitoring takes place of all activity of park guests and their abductions. These command centers monitoring Alien visitors and park guests called Visitor Alliance Command (VAC) centers will be reminiscent of the underground command centers seen in the films like "Future World" and "West World."

Fans should not expect to be able to predict what will happen next in this saga, extra effort will go into creating a story that will not only keep fans in suspense and throw them for a loop when trying to predict the outcome, but also creating a story that will live on in their memories months and years afterward, and keep them wanting to read and see more in possible future books and films that may follow to wet their appetites.

**Links:** Including Andrew's first book published in 2013, this project will be a 5-book / 4-film "Alien Park" SciFi Project. Judging by the reception that the second "Alien Park Dunes" book is receiving with readers saying they can't wait for Film 1 and Book 2 to be released, we are expecting that this project will not end with only 5 books and 4 films. Because of the marvelous story that still lies ahead in Books 2, 3, and 4, we believe that those books and films will only be just the beginning of a genie being released from the bottle, and we're hoping that book and film fans will be lined up at midnight for the release of the next book or film.

Andrew's first book "Southwest UFO Triangle Theory" <https://tinyurl.com/y239u975> took 20 years of research on the Roswell UFO Crash Site and the San Luis Valley in the Southwest Area of Colorado, New Mexico, and Texas. The second book "Alien Park: Dunes" which is the first of four Alien Park books was just released in November 2018. The first of four screenplays by the same title is currently being written. The second book and film will be titled "Alien Park: Caves"
